Instructions how to register OCX files for the software Down340 in Windows 7 64bit

General

When starting the software **Down340** it is possible that following error message will be displayed:

The file **MSCOMM32.OCX** needs to be registered correctly.
(The same procedure can be applied to additional OCX files such as: Comctl32.ocx; comdlg32.ocx; MSWINSCK32.ocx).

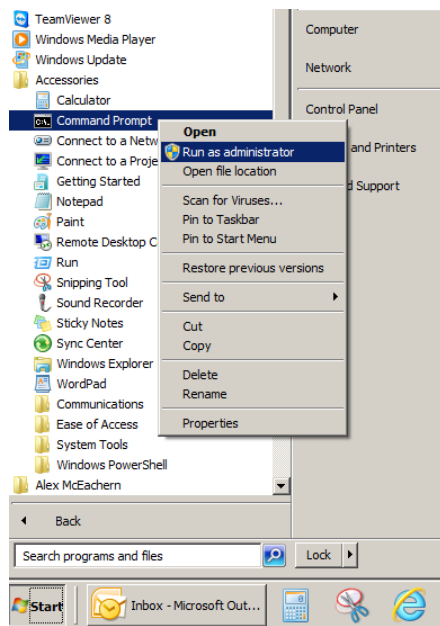

Procedure

1. Copy the file **MSCOMM.OCX** to following directory:
C:\Windows\SysWOW64
2. Start the **Command Prompt** with administrator rights:
Start > All Programs > Accessories
Right Click on **Command Prompt** and select **Run as Administrator**

Application Note / Instructions how to use jfWterm.exe in Windows 7 64bit

3. Write following entry in the command prompt window:
regsvr32.exe %windir%\syswow64\MSCOMM32.ocx

After pressing ENTER you should receive following message:

The software Down340 is now ready to use.
